

NANO-X Information

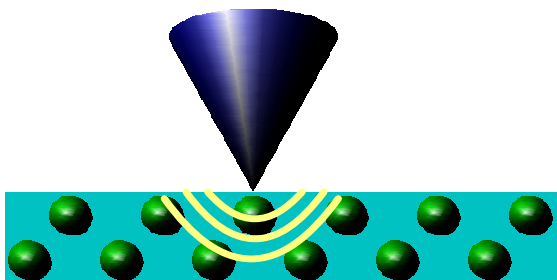

Multifunctionality:

Scratch and abrasion resistant coating systems in combination with hydrophilic or hydrophobic surface properties give a high range of innovative applications.

x-protect® KR Series

Principle:

The products of **x-protect® KR 3000 series** enhance the persistence of furniture, respectively decor, surfaces against scratches due to chemicals and cleaning powder or dirt due to leftovers, drinks and others.

Scratch resistant

Product Properties:

- Application by roller application, spraying or doctor blade
- UV-hardening
- Good adhesion
- Flexibel
- High abrasion resistance
- No swelling of the surface after water contamination
- No penetration of dyestuffs
- High chemical resistance
- Easy-to-Clean
- Optional: Antibacterial

Easy-to-Clean

Fields of application:

Furniture surfaces for interior and outskirt areas, floor coverings, sanitary facilities, laboratory areas, hospitals
